

# CORNELL NOTE-TAKING METHOD

What is your online learning goal? How will you know when you've reached it?

## How the Cornell Method Works

**Topic:**

**Speaker/Event:**

**Date:**

Fill this in to give yourself a quick reference point.

**Essential Question:**

Before the lecture, write down the biggest question you have about the topic you'll be covering.

**Questions:**

As soon as possible after the lesson, come up with questions based on your notes. Challenge yourself to ask real questions — not just about facts that you answer in the notes column, but about the significance of what you're learning.

**Notes:**

Take short, essential notes, paraphrasing what you hear instead of writing verbatim.

**Summary:**

After you've written down your questions, sum up what you've learned.
